

Mr. Crookston's Web (on Piner's Web page under Teacher's web pages)

I will keep this updated with all the information student will need for this year. My other way of communication will be by e-mail (about weekly).

Contents of web page:

**Algebra Video Lessons:** All my lessons for the entire year on .mp4 video. Each lesson is about 10 to 15 minutes that goes along with the student text. I do an example and the student will do an example out of the student workbook. You can use the filter to find the lessons easier.

**Calculator:** I have short videos on how to do functions on the various calculator. I also have examples of how to make programs on the TI84 plus. There are some links on how to use the Desmos calculator.

**Journal:** I have included all the cut-outs we used in class. The cuts out have a page number of where everything goes. I have also included a pdf of a 2020-21 Journal to view where the cut-outs belong.

**Resources:** This will hold the Syllabus (calendar for the year), notes and formula charts.

**Test and Reviews:** This has all the gold sheets (unit reviews), unit reviews for the test. I will include also answers and work for the tests and gold sheets. Completed Gold Sheets are what need to be done to take the unit retest.

**Worksheets:** I have all the unit worksheets zipped by unit. You can download any of these that you need.
