

Minutes for SHAC Meeting

May 23, 2017

The idea of starting up more school gardens was discussed during the meeting. Several campuses have had one from time to time, but consistency has been an issue. In the fall, the director of maintenance and operations will be approached for help with this project along with members of the Masters Gardeners. Crutchfield Elementary currently has a Garden Club that could prove helpful as this project gets off the ground.

The partners' fair/employee health fair that is held after convocation was discussed. It will be held on August 14. Members were asked for ideas for new participants. It was suggested that we look into hosting the event in the gym instead of the cafeteria.

Other topics discussed were the possibility of acquiring additional defibrillators for installation outside of the gym areas. Ways to obtain these other than the district purchasing them were discussed. The concept of an employee wellness program in conjunction with Aetna Insurance was discussed. The series of healthy living seminars hosted by John Nikirk was discussed for the upcoming school year.
